His "Five Points of Architecture", developed in the 1920s, not only shook up the world of architecture: Le Corbusier became one of the most influential architects of the 20th century. With fundamentally new aesthetics, he created masterpieces in architecture achieving worldwide fame.

Being a universal genius, he reached a lot farther than that: he intensively studied the design of rooms and details. Colours and their effects to him were as important as floor plans or form. For this reason, he extensively experimented with the effects of different shades of colours – developing his own colours scheme from there. His colour concept makes sure that every combination is harmonious – no matter whether subtle or striking shades are combined with each other.

Architecture by Le Corbusier - icons of the modern age: Maison la Roche in Paris (top), Chapelle Notre-Dame-du-Haut de Ronchamp (left) and Villa Savoye in Paris (right).

So far, 17 of Le Corbusier's sites have been inscribed by UNESCO on its World Heritage List.

INDIVIDUALTIY: CONFIGURE YOUR CHOICE OF DOOR

A door to your taste: dark frame, bright door panel – or just the other way round? Use the heroal front door configurator to design your heroal front door easily. Be inspired by the variety of colours and design the front door of your taste.

Your front door: unique

You can design your exclusive heroal front door to perfectly match you and your home: choose between different types of construction, types of sash, hinges, handle strip designs and technological extras such as using a fingerprint for opening. You can design the individual components using the various colours of Les Couleurs® Le Corbusier. The 63 colour shades are naturally harmonious and can be combined with each other in any way. Each colour represents specific spatial and human impacts. In addition, you may design the components using heroal SD, the surface design for wood and concrete looks, and the colours of the RAL chart. Discover fascinating colour designs now at

YOUR FRONT DOOR: MORE THAN A DOOR

To enable you to design your front door as the entrance of your taste, you can choose from a range of construction types: glazed sidelights or a toplight brings more light into the entrance area. Wide entrances as well as excessively high openings can also be conveniently designed.

YOUR OPTIONS: ALWAYS HIGH QUALITY

In order to turn a door into your personal front door, you have a huge freedom of design. But the design is not only about colour, but also about safety, heat insulation and comfort - for example by integrating a finger-print reader for a keyless opening of your door.

The fitting range heroal DF provides for three different designs to choose from. That means you will always find the right lever for your individual requirements.

heroal front door are made from highquality aluminium and therefore represent a long-lasting and sustainable product which is especially resistant to weather and corrosion. That way, you can enjoy reliable and easy serviceability over a long lifespan.

The heroal front doors are available in two sash variants: as a flush version, installed without any offset towards the house wall, or as a recessed version, silhouetted against the wall.

As an option, you can add a fingerprint system or an LED lighting in the handle strip to your heroal front door.

Highest comfort, maximum safety: as an option, heroal door fittings can be equipped with a keyless entry system. This allows access

be equipped with a keyless entry system. This allows access using a fingerprint reader; or opening the door via an app is possible, increasing the ease of use.

Door hinges

heroal surface hinges (right) and barrel hinges (left) may be coated in colours of the Les Couleurs® Le Corbusier range, colours of the RAL chart and in heroal SD: you can choose the same shade for sash, panel and hinges in order to achieve a fine-tuned colour identity or opt for setting accentuations of colour.

EVERYTHING UNDER CONTROL: COMFORT AND DESIGN

Persuasive when it comes to the opening mode: the elegantly integrated handle strip replaces the classic handle bar outside. The flush, ergonomic design not only creates a high-quality and modern look, but also ensures a comfortable grip. The colour of the handle strip can also be individually designed, using the Les Couleurs® Le Corbusier range of colours, heroal SD surface design and the RAL chart of colours.

The handle strip is available in three different lengths (from left to right): long, medium and short.

element rim is: sash height - X

1/3 of sash height

300 mm high, 900 mm distance from bottom

Additional accentuations of colour can be set by the optional LED strip lightings using cold or warm light, which can be integrated into the handle strip. They are also persuasive because of their durability and low energy consumption.
